

## **Join us in building our Patient Centered – Medical Home**

A Patient Centered – Medical Home is not a building.

It is a home base for your healthcare needs and is a partnership between you, your doctor, and other office team members. The care you receive here is centered on you. Together we will work towards making you as healthy as possible.

We will provide you with the information needed to help maintain or improve your health. However, you must be willing to apply these tools to your lifestyle. Your visit with your doctor is always kept private. Therefore, the more honest you are in answering the questions asked, the better the doctor can diagnose and treat you.

You may be receiving a letter, called a patient-provider partnership from our office, which explains this team approach and the mutual goals.

For quality healthcare, please let Dr. Dooley know if you have received any medical care outside of our office. Example locations would be: Urgent Care; Specialist's Office; Health Fair; Emergency Room; Hospital; or Walk-in Medical Clinic.

Your health is very important to us, and we will try to answer all of your questions and concerns. Please feel free to ask any of the staff members or your doctor.

We look forward to further working with you in your health care needs.

Sincerely,

*Victoria M. Dooley, MD*
